

Update 5

Alina Gafanova

August 18, 2021

Ongoing: Reading More Disaster Papers and Summarizing.

The literature section is being constantly updated since I still have a few papers that I found but haven't read in depth. I also made an attempt to structure literature I found in the beginning of literature section.

Done: We all met for the 2nd meeting!

After this meeting, I shifted my focus from just doing searches (literature, data) to more data exploration and analysis.

Done: Ishan shared firm-level data; Stephanie shared code for earthquakes data aggregation

Ongoing: Alina explores firms data and code

Stephanie guided me through her code that in the end will help us merge earthquakes data to firm panels. I wrote additional code for these purposes. Next step is to finally run adjusted code and start analysis.

Questions/tasks/thoughts

1. To Ishan I send out a list of questions related to firms data.
